

🔪 Bank of Mars – Guidelines to Open an Account 🚀

(Because managing your Martian finances shouldn't be rocket science... or should it?)

Step 1: Prove You're Not a Jupiter Spy

We take planetary security seriously. Bring your official Martian Residency Card or a valid Interplanetary Passport.

Earthlings must declare their species, intent, and snack preferences.

Step 2: Oxygen is Optional, But ID is Not

We accept the following IDs:

Martian Driver's Hover-License

Galactic Citizenship Certificate

Your holographic selfie with Elon Musk (from any dimension)

Step 3: Choose Your Account Type Wisely

Zero-G Savings – Your funds float, but your interest rate doesn't.

Lunar Checking – No gravity, no fees.

Asteroid Vault – For when you want to store your crypto AND moon rocks.

Step 4: Initial Deposit (Space Credits or Earth Currency)

Minimum deposit:

500 MarsCoins

OR one Earth taco 🌮 (subject to interplanetary conversion rates)

Step 5: Thumbprint, Retina Scan & Mind Meld

Security is everything. We'll need:

One biometric scan

A short telepathic interview

A firm Martian handshake (tentacles optional)

Step 6: Accept the Galactic Terms & Conditions

By signing, you agree:

Not to rob yourself via time travel

To notify us if your clone tries to withdraw funds

To laugh at our fine Martian print
